MINUTES OF THE CRITICAL COMMUNICATIONS COMMITTEE
MEETING - 8 MAY 1958

1. The Committee met with a number of guests representing JCEC and other communications activities of the Department of Defense.
2. The problem of volume of critical intelligence was discussed and it was agreed that critical intelligence, other than COMINT, would probably be of such a small volume that it would not constitute a burden on the communications system. Col. Dupree stated that he felt that this discussion was adequate guidance from the Committee on the problem of volume.
3. The Committee also discussed the DRAFT instructions to field reporting elements and the Chairman agreed to redraft the instructions in accordance with the discussion.
4. The Chairman suggested that the next meeting of the Committee should also address itself to developing a timetable for the implementation of the critical intelligence reporting system.

W. A. TIDWELL
Chairman, CCC
